

The Wheeler Way - Religion and Worldviews Curriculum INTENT

RW at Wheeler develops children's knowledge and understanding of faiths, beliefs and worldviews, so that they are able to develop their own views which are built upon respect, enquiry and reflection.

The subject pillars are:

Developing an understanding of your personal worldview, where it has come from and how it shapes your experiences.

Seeing, hearing and responding to different views, cultures and practices and considering how things look from different perspectives.

Understanding a range of religions and worldviews through the disciplines of Philosophy, Theology and Social Sciences.

Lessons which are built on an enquiry approach and foster children's ability to ask engaging and challenging questions.

Lessons in which children build knowledge, make connections and draw comparisons on local, national and global levels.
