

Times Tables Progression

Intent

At Wheeler we believe that it is important that children are given the opportunity to see, explore, and understand the mathematical structures and patterns of times tables for real deep, embedded learning. We want our children to know their times tables well and be able to apply these facts (and their inverse - up to 12x12). Being fluent in times tables facts means that working memory is freed up and leaves space to explore new mathematical ideas and solve more complex problems.

Implementation

- Introduce the basic facts and teach strategies for calculating and remembering them.
- Use lots of models and images so that the facts are not just abstract.
- Allow time for children to practice and memorise facts.
- Make parents aware of the half termly focus and facts their children are expected to learn.

Building up skills:

Step 1 – ‘Root facts’

Step 2 – ‘Root facts’ mixed up so no longer relying on patterns

Step 3 - Introduce tougher time restraints to encourage rapid recall (where appropriate)

Step 4 – ‘Root facts’ and inverses

Step 5 – ‘Root facts’ and any linked facts such as multiples of 10 or 100

Step 6 – Missing number problems

| | |
|---|---|
| Year 1: Multiples of x2, x10, root facts, commutative and inverse. | Year 2: x5, x3, x4 root facts, commutative and inverse. |
| Year 3: x6, x7, x8, x9 root facts, commutative and inverse. | Year 4: X11, x12 root facts, commutative and inverse. Doubles and halves of 20-50. |
| Year 5: Multiplying single digit numbers by 10, 100 and 1000. Dividing up to 4 digit numbers by 10, 100, 1000. Related multiples of 10/100/1000. Squared numbers and square roots. Doubles and halves of 50-100. Multiplying decimals. | Year 6: Cubed numbers and cube roots. Doubles and halves of decimal numbers. |

EYFS:

When children are ready, they will be exposed to counting in multiples of 2 and 10.
