

This Term's News

PE Days are on a Monday (1DM) and Tuesday (1AW). We will provide your children with a PE Kit (shorts and a t-shirt) but please send your children with trainers and hoodies in case the weather is colder.

Homework will continue to be given out on a weekly basis. This will be handed out on a Friday and will be linked to the topics we are covering.

During this term we will continue practising Year 1 spellings. 8 words will be sent home on a Friday afternoon and children will be tested on these words on the following Friday.

Please remember to encourage your child to read at home at least 3 times per week in order to receive their regular reader stamp! Just a reminder that reading **any** book is fantastic, not just your school books, and we would love to see these recorded in your reading records.

As Good Citizens we will:

Look at the religion Islam and the celebration of Eid. We will also explore the question 'Why is the world so special?'

As Authors and Readers we will:

Be extending and embedding our knowledge of the differing grammatical features in English and how we can utilise them in our writing. We will be writing stories, character descriptions, setting descriptions, explanation texts with many others as the term moves on.

We will read with an adult everyday developing our reading comprehension skills by answering a variety of questions about a text.

Curriculum News

Our topic this term is '**Up, Up and Away**'.

All our cross-curricular work will focus on the journeys within the UK and further afield.

Year 1

Summer Newsletter Up, Up and Away

Through PE we will:

Develop our athletic skills through travelling in a variety of ways including hopping, jumping, running and skipping.

We will continue to refine our hand-eye co-ordination to improve our throwing, catching, batting and fielding skills playing multi skills invasion games.

As Historians we will:

Take a journey back through time and learn about the journeys taken by Amy Johnson around the world.

We will learn about Amy Johnson's life, her achievements and the legacy that she has left in Hull.

As Scientists we will:

Work scientifically looking at plants and how they grow in different environments.

We will continue to observe the weather to see how it continues to change throughout the seasons.

We will identify patterns and changes that occur in our environment as a result.

As Artists and Designers we will:

Explore and look at the work of Pablo Picasso and create a collage of our own face.

We will practise sewing skills including a running stitch to design our very own happiness flags inspired by Amy Johnson Moths that are within the city.

As Mathematicians we will:

Work with numbers within 100, counting forwards and backwards, writing numbers in numerals and finding one more or one less.

We will continue to look at multiplication and division looking at numbers in groups of 2s, 5s, 10s.

We will also start to explore finding a half or a quarter of a shape or object.
